

## Bonnies Bloomers dot net web site

Need a loader program for <sup>①</sup>Annuals – <sup>②</sup>perennials – <sup>③</sup>shrubs and <sup>④</sup>Trees flowers being sold – (All Flowers have two names Botanical and common):

4 pages

Fields for loader program-

Picklist type:

- Annual
- Perennial
- Trees
- Shrubs

Fields:

Botanical Name

Common Name

Link

Link to outside web site

Picture

Pick list – Sun – (only applies to All 4 annual or perennial flowers)

- Sun
- Partial Sun
- Shade

Pick list – shrubs and trees – Only Type

- Deciduous
- Evergreen

used only on "Trees + Shrubs" pages -

Picklist – For all four shrubs and trees only – Moisture Requirements

- Dry
- Moist
- Wet

<sup>①</sup>Build A separate "page" for <sup>②</sup>Annuals, <sup>③</sup>Perennials, <sup>④</sup>Trees and Shrubs (eventually we will add these pages to the main menu)

All pages will be three up <sup>pictures</sup> ~~The Annuals and perennials flowers pages~~, will be three up pictures of the ~~flower plant~~, the two names, a link and sun Pick list and the moisture – the trees and Shrubs will also have the deciduous and evergreen (Sun, partial sun or shade.)

And

Want to be able to sort ~~flower annual or perennial each of the two display pages three~~ four ways:

1. Common name alpha
2. Botanical name alpha
3. Sun pick list

3.4. Moisture Pick List  
and then on trees + Shrubs - Deciduous + Evergreen

Then have a look up - so someone could type in the common or botanical name and to find the flower Tree or shrubs

Default for each of the ~~two~~ pages - alpha view by common name

Colors

Yellow are buttons to sort alpha - blue is buttons to sort just the full sun or just the partial sun or just the shade - but they come up in alpha after the sort

Annual Flowers (page sort design:) - (same page design for Perennial Flower page)

Sort by:

$\circ$  = 's radio buttons - people click on or off

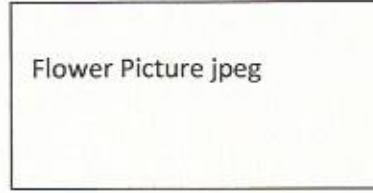

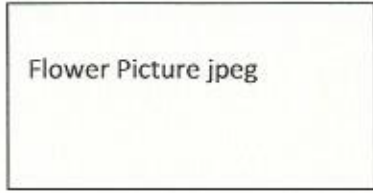

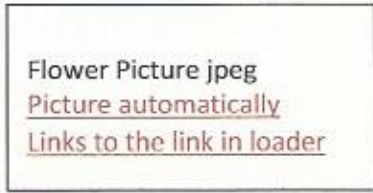

- Common or  Botanical Name (one or the other not "and" sort) - This is an "or" sort
- Full Sun  Partial Sun  Shad (This is an "and" sort - so they could pick two or even all three)
- Dry  Moist  Wet (This is an "and" sort - so they could pick two or even all three)

Lookup by name

Annual Flowers - Sort by: Common Name Botanical Name Full Sun Partial Sun Shade  
Same of perennial page

Same page with Perennial flowers

---

For trees and shrubs – two pages one for trees and one for shrubs

- **Shrubs (or Trees) – 2 different pages one for trees and one for shrubs –**
- *Sort by:*
- **Sort by:**  Common Name  Botanical Name ← "on" sort
- Deciduous  Evergreen } "and" sorts
- Evergreen } Radio Buttons
- Dry  Moist  Wet
- Full sun  partial sun  shade

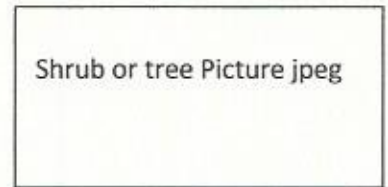

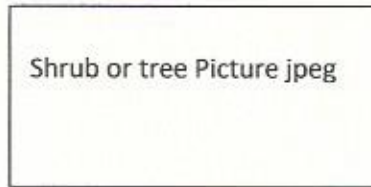

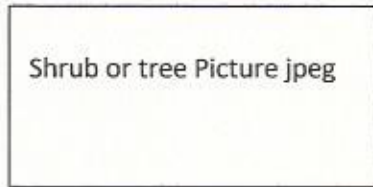

Default sort is common name

Need lookup field like below – same as w flowers

If person clicks on "common or Botanical name" then provide list in Alpha sort

If "Evergreen or Deciduous" sort alpha then option of dry – moist – wet and sun
